LIZFARIA
SOFTWARE DEVELOPER

www.lizfaria.ca 👋 hello@lizfaria.ca 👋 @lizcookscode

ABOUT

Hi, my name's Liz and I'm a software developer based in Toronto who specializes in JavaScript and React. I work hard because I love the limitless possibilities for learning, connecting and creating that comes with development. I'm looking to join a team that fosters these values through mentorship and opportunities for professional development.

EXPERIENCE

FREELANCE DEVELOPER
Self Employed, October 2019 - Present

- develop websites to match client wireframes using Gatsby, Netlify CMS, React, GraphQL, SCSS and Styled Components
- manage projects using Github and Asana
- mentor students and mark projects for the part-time Accelerated Web Development Course at Juno College of Technology

FRONT-END DEVELOPER
Tennis Design, September 2018 - October 2019

- develop websites for major education, arts, science, technology and business organizations using JavaScript, jQuery, CSS, HTML, Django templating and Git
- stay informed with innovative web technologies, web design trends, and best practices in backwards compatibility, responsiveness and accessibility
- work with designers and a back-end developer to scope, refine and implement invision prototypes, as well as create actionable design revision

MENTOR
Canada Learning Code & HackerYou, April 2018 - present

- empower budding developers to feel a sense of belonging and excitement about coding
- engage with students to clarify class material and help build web projects
