ABOUT

Hi, my name's Liz and I'm a full stack developer who specializes in JavaScript. I have several years experience developing enterprise applications in the entrepreneurship, banking and restaurant sectors. I enjoy collaborating across teams to bring clarity and direction to complex problems. I bring a strong sense of ownership to my work and strive to build high quality products that have a positive impact on users' lives.

EXPERIENCE

FULL STACK DEVELOPER

Ownr (RBCx), April 2020 - Present

Typescript, React, Next, Node, GraphQL, REST, PostgreSQL, Redis, Jest, Puppeteer, Github Actions, Copilot

- develop the core application to collect user data and build automations to access bank and government sites to legally incorporate and manage companies for users, as well as generate legal documentation
- strengthen app security and meet bank compliance standards by leading the migration of the custom identity service across 4 applications to Auth 2.0 standard. Successfully migrate 400,00+ users from the database to the OKTA auth server. Collaborate with stakeholders to ensure the new flow is intuitive.
- empower the customer support and ops teams by adding GraphQL endpoints to update client data on the admin application
- help build the custom component library to match Figma designs
- migrate the frontend codebase to use ES6, TanStack Query, Styled Components and increase test coverage
- champion standards for WCAG accessibility and responsive design
- participate in hiring interviews and buddy with new team members to walkthrough codebases, documentation, coding standards and Git practices

FULL STACK DEVELOPER

TouchBistro, March 2019 - April 2020

Typescript, React, Node, Amazon RDS, Jest, Cypress, Datadog

- collaborate with an agile team to add new reporting features to improve customer's business insights and overall UI experience, as well as improve existing performance, data reliability and accessibility
- lead the migration of the frontend codebase to a more maintainable and performant codebase

FRONTEND DEVELOPER

Tennis Design, September 2018 - October 2019

Vanilla Javascript, jQuery, CSS, HTML, Django Templating

- develop innovative, responsive and accessible websites for education, arts, science, technology and business organizations
- work with designers and a back-end developer to scope, refine and implement invision prototype

MENTOR

Canada Learning Code & Juno School of Technology & Hackergal, April 2018 - present

- engage with students, clarify class material, and mark projects for the Accelerated Web Development and JavaScript Courses at Juno College of Technology
- empower budding developers to feel a sense of belonging and excitement about tech and coding

Education
